EDUCATION

Binary State University   Silicon Valley
Bachelor's in Code Compilation Engineering   August 2019 - July 2023
CGPA: 8.42/10.00

EXPERIENCE

ByteCraft Technologies | Software Wizard-1   August 2023 - Present

- Revolutionized the binary dashboard UI, **reducing mouse clicks by 35%, expanding pixel real estate by 20%, and debugging all rogue CSS**
- Engineered 5 end-to-end reliability features, **slashing bug response time by 85%** and saving the debug team over 100 coffee breaks per month
- **Crafted a cloud-powered alternative** to the ancient file portal, **turbocharging file processing by 40% and fortifying system stability** for 2-3 million digital artifacts
- **Architected central data vault service** on cloud, **turbocharged data fetching by 60%** for over 5 apps that previously played phone tag with other services
- **Spearheaded BitVision** an AI service that decodes transformation patterns, born from a caffeine-fueled Hackathon, gained cult following and is now preparing for its grand debut
- **Reimagined Data Squeezer using cloud magic**, achieving **50% smaller digital footprint and 95% less server napping time**
- **Robot-ified 10+ manual report deliveries** using AutoMagic, eliminating human-induced delays

ByteCraft Technologies | Code Apprentice   February 2023 - July 2023

- Conjured proof of concept for a **database juggling app** that can dance with multiple databases simultaneously while drawing pretty graphs, **reducing manual keyboard mashing by 15%**
- Sketched UI blueprints for legacy app metamorphosis, **boosting click efficiency by 35%** and future-proofing screen real estate

ByteCraft Technologies | Code Padawan   June 2022 - July 2022

- **Crafted 2 pages with babel-fish translation** for ByteCraft.com, using homegrown pixel-pushing framework
- Designed fancy navigation for micro-frontends with quantum routing, **reducing page lag by 30%**

PROJECTS

BitBuddy | Link 🔗   NodeJS, ReactJS, Socket IO, PixelPerfect

- **Conjured real-time collaborative code magic**, enabling synchronized keyboard orchestra and efficient multi-wizard coding sessions
- **Polished user experience** with instant updates and smart features like **self-closing portals and brackets**

HONORS & AWARDS

- **Code Council Leader**, orchestrating events for 2000+ keyboard warriors at ByteCraft
- **Silver Medal** in CryptoMania Hackathon, among **400+ teams**
- **Universal runner-up** at CodeCraft Global Hackathon with 1000+ teams from 20 realms
- **Knighted** by ByteCraft Archmage for exceptional spells in system stability
- **Grand Champion** of DigiCrop Hackathon, Ministry of Digital Agriculture
- **Architected MVP** for BitChain, valued at $400,000 in Seed round
- **Supreme victor** at CodeQuest Hackathon, hosted by Binary Wizards Club
- **Regional champion** at TechTrivia Tournament, among 10k+ knowledge seekers

TECHNICAL SKILLS

Spell Languages	C++, Python, Java, JavaScript, HTML, CSS
Magical Tools	React, SpringBoot, Next JS, Redux, JUnit, Jest
Artifacts	Git, BitBucket, Terraform, Cloud Magic, Figma
Knowledge Vaults	MongoDB, Supabase, MySQL, Crystal DB

CERTIFICATIONS

- **Cloud Architect - Supreme** 🔗 - Issued by Cloud Wizardry Council
- **Infrastructure Sage: CloudForm Master** 🔗 - Issued by CloudCraft
- **Digital Resources Master** 🔗 - Issued by Binary Foundation
